

Sage MAS 90 and 200 Integrated Solutions Compatibility Matrix Revised as of December 28, 2006

The Integrated Solutions Compatibility Matrix is intended to cover all information as of December 28, 2006, regarding all Sage MAS 90 and 200 Integrated Solutions compatibility with Sage MAS 90 and 200. Any version not listed should be assumed to be *incompatible*. If your configuration is not listed, Sage Software Customer Support cannot provide support for you. All hardware and system requirements must meet or exceed the minimum requirements for Sage MAS 90 or 200 as indicated in the applicable Supported Platform Matrix. Only additional requirements are listed in this matrix.

Note: Before and during an installation, thoroughly review this document, along with the installation guide, the Supported Platform Matrix, and the Hot Pre-Installation Information page on the Sage Software Online Web site at: www.sagesoftwareonline.com

Only the current release versions of the product should be run. If Master Developer customizations or modifications have been made to your Sage MAS 90 or 200 software, coordinate with your Sage Software business partner and your Master Developer before installing a new version of Sage MAS 90 or 200. It is our general policy to support only the current version of the software and one major revision back.

As of the release of Sage MAS 90 and 200 version 4.10, we officially retired support for Sage MAS 90 and 200 Level 3.70 and lower. Sage MAS 200 for SQL Level 3.71 is still supported. Alternative support options may be available through your Sage Software business partner. Program fixes will continue to be made available only on the current version of the software. For information about support policies, refer to the Sage Software Online Web site at: <http://support.sagesoftwareonline.com/>

ACT! Link, Abra HR Link, FAS Link, and StarShip Link must be at the same version as the other Sage MAS 90 and 200 modules installed. The one exception to this is ABRA HR Link Version 4.0, which is also compatible with Level 3.71 of Sage MAS 90 and 200.

Web site content can change at any time. Sage Software has no control over, and cannot be responsible for, the content of other companies' Web sites.

2005.1	3.71-4.10	3.71-4.10	3.72-3.73	Remote Access: <ul style="list-style-type: none"> ▪ Cannot be used across subnets without Terminal Server and/or Citrix 	Due to frequent law changes, the most current version of FAS 100 Asset Accounting should be used. The standard (non-SQL) version of FAS is compatible with Sage MAS 200 for SQL Server using the FAS Link located on the Sage MAS 200 for SQL CD-ROM. It is recommended that you install FAS and Sage MAS 200 for SQL Server on separate servers. FAS Link is only compatible with FAS for Windows. If FAS SQL is installed, use the FAS Universal General Ledger Link to create the depreciation file and then import the file into General Ledger with Visual Integrator. The FAS Universal General Ledger Link is preinstalled when FAS for SQL is installed. The serial number to activate this link is e-mailed to the customer at the time the order is placed. If you own FAS for SQL and did not receive the serial number, call FAS Sales at 800-368-2405. Note: Visual Integrator is a Sage MAS 90 module that imports data into Sage MAS 90 or 200 from external data files. Sage Software Customer Support is not responsible for assisting with creating or troubleshooting imports. Contact your Sage Software business partner for assistance.
